

Application No.: 10/657,563  
Art Unit: 3712

Attorney Docket No. 23247.00  
Confirmation No. 3306

**IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1 Claim 1. (*Currently Amended*) A dummy practice rifle grenade, comprising:

2 a generally cylindrical nose cone having a central axis;

3 a cylindrical body having a central axis and having a front portion having a perpendicular front wall,

4 a central portion, and a rear portion having a perpendicular rear wall; and

5 a finned tail;

6 said nose cone having a front cone portion tapering axially inward to a front flat perpendicular to

7 said axis, a central cylindrical portion extending rearwardly from said front cone portion, and an inner taper

8 portion extending rearwardly from said central cylindrical portion and tapering axially inwardly to a rear flat

9 perpendicular to said axis;

10 said nose cone having a rear opening rear axial bore having a first diameter extending forward to

11 the intersection of said cylindrical portion and said inner taper portion, and having a central axial bore

12 having a second diameter smaller than said first diameter opening into said rear axial bore and extending

13 forward to a front wall located within said central cylindrical portion and about to a point about half the

14 length of said cylindrical portion, said rear axial bore and said central axial bore forming a cone inner step

disposed perpendicular to said axis;

Application No.: 10/657,563  
Art Unit: 3712

Attorney Docket No. 23247.00  
Confirmation No. 3306

16 said cylindrical body front portion extending into said nose cone along said rear axial bore and  
17 affixed thereto, said front wall resting against said cone inner step forming a volume defined by said  
18 cylindrical body front wall, said central axial bore, and said central axial bore front wall, said volume  
19 containing lead shot;

20 said cylindrical body rear portion and central portion having a rear opening axial bore extending  
21 therethrough of such diameter as to receive a launching rifle nose;

22 said finned tail having a cylindrical portion coaxial with said cylindrical body and having a front  
23 surface and a rear surface and having a plurality of radially extending outward therefrom;

24 said tail cylindrical portion extending over said rear portion of said cylindrical body and affixed  
25 thereto.

1 Claim 2. (*Original*) The practice grenade of claim 1, wherein said finned tail cylindrical portion and said  
2 cylindrical body rear portion have mutually engaging threads for removably affixing said finned tail  
3 cylindrical portion to said cylindrical body.

1 Claim 3. (*Original*) The practice grenade of claim 2, wherein said finned tail has four fins equally radially  
2 spaced around said cylindrical tail portion.

Application No.: 10/657,563  
Art Unit: 3712

Attorney Docket No. 23247.00  
Confirmation No. 3306

1 Claim 4. (*Original*) The practice grenade of claim 3, wherein said lead shot is selected to provide a center  
2 of gravity at a desired point along the length of said grenade.

1 Claim 5. (*Original*) The practice grenade of claim 4, wherein said nose cone is affixed to said front  
2 portion of said cylindrical body by an adhesive material.

1 Claim 6. (*Currently Amended*) The practice grenade of claim 5, wherein the overall length of the practice  
2 grenade is ~~about~~ 9 1/4 inches.

1 Claim 7. (*Original*) The practice grenade of claim 6, wherein the overall nosecone length is 3 3/4 inches;  
2 the front flat diameter is 3/4 inch; the front cone portion length is 1 3/4 inches; the nose cone central  
3 cylindrical portion is 2 inches in diameter and 1 inch in length; the nose cone inner taper portion is 1 inch  
4 in length; the nose cone diameter at nose cone rear flat is 1 1/2 inches; the nose cone rear axial bore is 1  
5 inch in length and 1 1/4 inches in diameter; the nose cone central axial bore is 1/2 inch in length and 7/8 inch  
6 diameter; the cylindrical body overall length is about 6 1/2 inches; the cylindrical body axial bore is 7/8 inch  
7 in diameter and 5 1/2 inches in length; the tail length between front and rear surfaces is 1 1/2 inches; the  
8 tail cylindrical portion diameter is 1 3/4 inches; the tail fin length is 1 1/2 inches; and the tail fin thickness  
9 is 3/8 inch.

Confirmation No. 3306

1 Claim 7 8. (*Currently Amended*) The practice grenade of claim 2, wherein said tail attachment and  
2 receiving threads are 1 1/4 inch by 7.

1 Claim 8 9. (*Currently Amended*) The practice grenade of claim 1, wherein said nose cone and said tail  
2 are made of a plastic material and said cylindrical body is made of aluminum.

1 Claim 9 10. (*Currently Amended*) The practice grenade of claim 8 9, wherein said plastic material is  
2 a high-density polyethylene and said aluminum is 6061 aluminum.
